Wholesale glass bottles

We want to design such a slim and elegant bottle. The contour of the bottle body creates a smooth, clean and simple linear contour. Slightly tapered shoulders and a slender, straight body shape an elegant outline. Simple and generous, with a variety of functions to choose from. The straight and slender bottle body provides more inspiration for label design. It is suitable for many types of wine products, such as vodka, whisky, gin, brandy and so on. It is convenient for you to reserve the second processing slot at the bottom. At present, there are enough glass bottles in stock. Welcome to consult. Glass bottle with lid
